SOUS-VIDE COMPACT 54 KG

Custom Made Sous-Vide Solutions

Sous-vide cooking has many advantages in the commercial kitchen. We specialise in the production of customised sous-vide equipment.

The sous-vide cooking method cooks food under vacuum which contributes to the preservation of the product. We have extensive experience in the production of sous-vide equipment which is produced in brushed stainless steel for easy cleaning. The user-friendly touch-screen display serves all the functions of the machine.

How does it work?

Sous-vide cooking consists of cooking a vacuum-packed product. The food is prepared and vacuum-packed. Then the product is cooked in a water bath until the desired temperature is reached. Meat that requires a crust must be fried or baked either before or after the sous-vide cooking.

With sous-vide the taste is the winner:

- Ensures tender meat
- Retains the aroma and overall quality of the food
- Preserves food longer
- Minimizes shrinkage

Sous-vide systems offer many advantages:

- Timesaving
- Flexible
- Minimizes staff requirements
- Easy workflow
- More hygienic

Benefits

Even though the sous-vide cooking method was developed in a lab there is nothing artificial about food cooked in a sous-vide. Vacuum prepared products have longer shelf life and the cooking bags retain aroma and overall quality of the food offering a full taste experience. In addition sous-vide cooking ensures maximum tenderness in all meat cuts

Benefits in the kitchen

In commercial kitchens the sous-vide is essential in achieving unique operational profits. Thanks to the sous-vide cooking method allowing for bulk production, it is a staff reducing production method. The products' prolonged shelf life provides an opportunity to separate in time the preparation and serving, offering great flexibility in production planning. Thanks to the airtight packaging no contamination will occur when handling the products.

TECHNICAL SPECIFICATIONS:

SOUS-VIDE COMPACT 54 KG.

Build in cooling machine

Cold water: 3/4", 2 1/2 bar

Hot water: 3/4", 2 1/2 bar

Drain: 5/4"

Power supply: CEE plug, 16 A fuse, 3x400 Volt + N + PE

Mål: 1000 x 900 x 950 mm. (L x B x H)

Kg. pr. bats: 54
